

## Product Description

GeoCHEM PP30 and PP40 are exceptionally flexible geomembranes achieved by incorporating high levels of ethylene propylene rubber into polypropylene. GeoCHEM polypropylene membranes contain no plasticizers that can leach out and hinder long-term flexibility and performance. GeoCHEM PP Series provides outstanding resistance to environmental stress cracking even at elevated temperatures and in addition to aggressive chemical environments.

## Product Use

GeoCHEM PP30 and PP40 are used in a wide variety of applications that require a unique combination of mechanical toughness, exceptional flexibility and environmental resistance. GeoCHEM's polypropylene geomembranes also offer a high-friction angle which reduces concerns for side slope stability. A low coefficient of thermal expansion significantly reduces wrinkling in a wide range of temperatures. This product may be considered for containment of leachates from typical Municipal Solid Waste per EPA 9090 testing in addition to black liquor from paper manufacturing.

## Size & Packaging

GeoCHEM PP30 is available as a custom run product with minimum order requirements. GeoCHEM PP40 is available in up to 25,000 square foot panels. All panels are accordion folded every 5 feet, and tightly rolled onto a heavy-duty core for ease of handling and time-saving installation.

Containment Liner

Product	Part #
GeoCHEM.....	PP30
GeoCHEM.....	PP40

## APPLICATIONS

- Canal Linings
- Decorative Ponds
- Landfill Caps
- Waste Ponds
- Golf Course Water Traps
- Brine Ponds
- Aquaculture
- Evaporation Ponds
- Mine Tailing Ponds
- Fire Ponds
- Remediation Liners
- Farm Ponds
- Fish Hatcheries
