Turf Penetrator Tablet

For use with Drench Applicator

Wetting Agents are unique in lawn care and in nursery applications. They hold the moisture at the root profile to conserve water and enhance lawn and gardens natural ability to grow.

Localized Dry Spot often occurs in grass. Small isolated patches that are best spot treated rather than by blanket applications. The Applicator is designed for use with the **Turf Penetrator Tablet** to make spot treatment as simple and as effective as possible. It is fitted with a rose-type head to give an excellent spray pattern and can be used over a wide range of water pressures.

Features and Benefits of Turf Penetrator Tablets:

- 100% Active Ingredient
- 3 active components – wetting and spreading agent; soil penetrant; re-wetting agent
- Packaged in easy to use single tablet bags
- Spot Treatment - One Tablet will last for 1—2 hours depending on water pressure
- **Turf Penetrator Tablets** with Micronutrients are available to provide stimulation for healthier garden and plant growth. Perfect for potted plants and hanging baskets.
- Ideal for **WATER CONSERVATION...Turf Penetrator Tablets** provide better penetration into the soil profile. Water stays at the roots instead of water run off associated with normal watering, in turn if the grass and plants retain more moisture less irrigation is needed for healthier happier plants and lawns.

Features and benefits of Applicator:

- Super heavy-duty non-cracking bowl design
- No parts assembly required.
- Specifically designed for Wetting agents.
- Unique variable flow control and on / off feature
- Easy load container
- No chance of incorrect flow direction
- Ergonomically designed for syringing.
- Use at either end or beginning of hose.
- Very easy to use - take one Tablet and place in the chamber of the Applicator place chamber into position and turn on water supply.

Application Recommendation

Turf penetrator Tablet should be used as required. Repeat applications as necessary. **Turf Penetrator Tablet** is specifically designed for spot treatment of severely affected areas through the proper hose-end applications. **Turf Penetrator Tablet** is inserted into the applicator vessel of the hose-end device and as water pours over the tablet, it slowly dissolves. Rate of dissolution will depend upon water pressure and temperature.
