

Germinator Booster

Premium Wetting Agent with Balanced Biostimulant Package

Germination Booster is a proprietary blend of high quality ingredients that optimize efficient use of water and nutrients. Provides for more uniformity of soil moisture and allows for improved water penetrations that reduce erosion and run-off.

Contains:

- Balanced Biostimulant Package – Insures rapid early growth with healthy root system. Delivers biostimulants where the new seedlings emerge so it easily accessible to the newly developing root system. This is essential for photosynthesis and subsequent healthy growth. Seaweed extract provide micronutrients and often exhibit hormone type responses. Humic acid promotes greater root and shoot growth, root branching, leaf chlorophyll content.
- Specific Flocculant Tackifier – Quickly drops the sediment out of water runoff so it does not contaminate streams, lakes and rivers.
- Healthy, fast growing plants are more resistant to disease and insects
- Fast establishment reduce regrading and reseeding cost

Benefits

- Improves water penetration, water movement in the soil and moisture retention
- Faster germination with more available moisture
- Improves rewetting capability of soil
- Improves nutrient uptake
- Provides beneficial nutrients to help with plant establishment
- Reduces erosion and runoff – soil stays in place and not deposited into stream, rivers and lakes
- Improve profitability to contractor by reducing regrading and reseeding cost.

GENERAL RECOMMENDATIONS:

IF SEEDING DRY APPLICATION METHOD: Apply in homogeneous water mixture immediately after seeding at the rate of 1-2 gallons per acre.

IF SEEDING HYDRAULIC METHOD WITH WATER MIXTURE APPLICATION (EX: HYDRO-TYPE SEEDING EQUIPMENT):

Apply in homogeneous water mixture in conjunction with seed application at the rate of 1-2 gallons per acre.

NOTE: Always shake vigorously before using. Apply only at label rate.

WETTING AGENT = Germination Boost

BIO-STIMULANT = Growth Boost

FLOCCULANT-TACKIFIER = Stability Boost

Germination Booster

Advanced Micronutrient and Erosion Control Combination

GENERAL INFORMATION:

HIGH QUALITY WETTING AGENT: Keeps the soil evenly moist so seeds germinate quickly and uniformly. Allows water to easily penetrate the soil so that less runs off the surface.

Net Contents: 16 oz
