

Applicators frequently ignore cleaning agents in the belief that a thoroughly washed sprayer will be free from harmful residues and other contaminants. In most cases however, simple flushing with standard cleaners do not suffice. To avoid subsequent damage and a build up of residues in the tank, all traces of herbicide should be removed from spraying equipment with **Tank Cleaner** after spraying

Tank Cleaner attaches to and lifts off contaminants

Tank Cleaner does not depend on a single detergent or strong solvent. Instead, it has a 2 way action that includes a surfactant system and a blend of sequestrants.

Herbicide	Phytotoxicity score
glyphosate 360g/l	0
glyphosate 480 g/l	0
2,4-D	0
mecoprop	0
triclopyr	0

Herbicide	Phytotoxicity score
fluroxypyr	0
paraquat	0
iprodione	0
chlorothalonil	0
trace element mix.	0

Tank Cleaner is effective against a range of selective herbicides, total herbicides, trace elements and fungicides.

Removes carfentrazone-ethyl, flupyr-sulfuron-methyl, metsulfuron-methyl, rimsulfuron, thifensulfuron-methyl, tribenuron-methyl and triflurosulfuron-methyl

Application: **Tank Cleaner** is a specially formulated liquid sprayer cleaner which removes pesticides deposits and other debris including oily substances from: tanks booms hoses filters and nozzles. The product can also be used on the outside of the sprayer through a pressure cleaner to remove deposits and dirt.

Rate of Use

Use at the rate of 0.25% based upon the volume of water to fill the tank

Size of Tank	Quantity Spray Tank Cleaner
500 Gallons	1.25 gallons
1000 Gallons	2.5 gallons

For more difficult wash outs use the increased rate of 0.5% based on the volume of water in the tank

Size of Tank	Quantity Spray Tank Cleaner
500 Gallons	2.5 gallons
1000 Gallons	5 gallons
